Founded in 1975, M S International, Inc. is the leading distributor of natural stone in North America. Headquartered in Orange, California, MSI also maintains thirteen state-of-the-art distribution centers in the U.S. and Canada. Our product line includes granite, slate, marble, travertine, sandstone, quartz, limestone, quartzite, porcelain, ceramic, sinks, glass and other flooring, countertop, and landscaping items imported from 36 countries in six continents. We also maintain overseas purchasing offices in India, Turkey, Brazil and China.

MSI’s mission statement is clear: provide our customers with the highest quality and broadest selection of flooring, countertop, and landscaping products at affordable prices. With the largest inventory of natural stone in the country (over 40 million square feet), our scale and efficiency enables us to provide competitive pricing with the quickest delivery times.

Our nationwide sales force encompasses all major channels of distribution including:

- Hard Flooring Dealers
- Mass Merchants
- Landscaping Dealers
- Architects
- Fabricators
- Soft Flooring Dealers
- Contractors
- Designers
- Builders
- Hospitality
- Commercial Projects
- Building Supply Yards

Our top priority is providing the highest level of customer service in the industry. MSI strongly believes that we are in the information business of natural stone. Our worldwide team of over 700 employees seeks to provide you with all the tools and information required to promote our product line. In addition, MSI’s state-of-the-art information systems provide you with the most accurate real time information on inventory availability, lot level pictures, status of shipments, and pricing. MSI’s ongoing product knowledge seminars help in training your sales force. We also have the ability to offer you advanced natural stone display systems and custom tailored packaging to aid in merchandising. Our website, www.msistone.com contains the most up-to-date information on our products including pictures, room scenes, size available and technical specifications. The website also has a stone selector, the most advanced natural stone search engine. Finally, our website offers the most up-to-date news and information on MSI.

MSI is a proud member of the Marble Institute of America, National Minority Supplier Development Council, the U.S. Green Building Council, the Natural Stone Council (NSC), and the Building Stone Institute.

Additionally, MSI’s entire product line is GREENGUARD Certified. The GREENGUARD Certification Program is a third-party certification for low-emitting products. The program identifies specific products that are tested on an ongoing basis to ensure that their chemical and particle emissions meet rigorous indoor air quality guidelines and standards. This certification program is a valuable tool for architects, designers, product specifiers, and purchasing organizations that want to locate, specify, and purchase low-emitting products to create healthier indoor environments.

MSI’s purchasing team travels around the world in order to source the highest quality natural stone at the best prices. In addition to purchasing offices in India, China, Brazil and Turkey, we maintain strong relationships with over 500 suppliers in 36 countries. MSI’s worldwide team regularly visits these suppliers to ensure quality. Also, our worldwide presence puts us at the forefront of the market in identifying new products and trends in natural stone.

MSI’s nationwide distribution system is focused on efficiency. With over 18,000 containers imported in 2011, we have strong direct relationships with major shipping lines and trucking lines. With our own fleet of over 100 trucks, as well as 40 overhead cranes, we have the ability to meet your needs across North America.

Buyer/Owner must determine slip resistance suitability and maintainability. Natural stones, ceramic, porcelain, quartz and related products represent products of nature; we cannot be held responsible in any cause of action resulting from their use in any form. M S International, Inc. makes no expressed or implied warranty or merchandisibility or fitness for any particular purpose. These products inherently lack uniformity and are subject to variation in aesthetics, color, shade, finish, tint, hardness, strength resistance, density, etc. Natural stone may be characterized by dry seams, pits, and fossils. In polished and honed stones, these pits are often filled during the manufacturing process or at the time of installation. These fills can occasionally pop out from normal wear and use. In these instances, it may be necessary to refill these voids as part of a normal maintenance procedure. Any samples submitted are with the understanding that these qualities are inherent in the nature of the product and are not to be considered latent defects.

Venetian marble is a beautiful and affordable alternative to cultured marble and tile for both residential and commercial uses including:

» Tub and Shower surrounds
» Bathroom Vanities
» Tub Pedestals
» Wainscots and Wet walls
» Stair Treads
» Furniture
» Flooring

Venetian Marble Uses and Advantages

» 60”+ slabs mean no back wall seams and less waste
» The warmth and beauty of natural marble with superior strength
» Less breakage during fabrication and installation
» Better Color consistency
» Low water absorption / No sealing required
» Ability to match flooring with walls and countertops

Product categories and classifications such as Granite, Marble, Travertine, Limestone, Quartzite, Sandstone, etc. are based on generally accepted industry acceptance or classification. They do not necessarily reflect the geological composition of the material or customs classification. In many cases, these materials are technically made of a different geological makeup. For example, many stones are commonly known as granites, but geologically, they are actually Charnockites, Polimitic Mataconglomerates, Gneiss and other various different geological stones. In addition, many stones commonly referred to as marble are geologically limestone. MSI makes no guarantee or representation of the geological composition of any stone. In addition, the categories reflected on our website or brochure, should not necessarily be used for customs classification.

Buyer/Owner must determine slip resistance suitability and maintainability. Natural stones, ceramic, porcelain, quartz and related products represent products of nature; we cannot be held responsible in any cause of action resulting from their use in any form. M S International, Inc. makes no expressed or implied warranty or merchandisibility or fitness for any particular purpose. These products inherently lack uniformity and are subject to variation in aesthetics, color, shade, finish, tint, hardness, strength resistance, density, etc. Natural stone may be characterized by dry seams, pits, and fossils. In polished and honed stones, these pits are often filled during the manufacturing process or at the time of installation. These fills can occasionally pop out from normal wear and use. In these instances, it may be necessary to refill these voids as part of a normal maintenance procedure. Any samples submitted are with the understanding that these qualities are inherent in the nature of the product and are not to be considered latent defects.
